AMERICAN SOCIETY FOR CELL BIOLOGY

PLACEMENT SERVICE NOTICES

The ASCB Placement Service, with the cooperation of The Journal of Cell Biology, will publish notices of Positions Desired and Positions Available for cell biologists in the March, May, July, September, and November issues of the Journal. Respective deadlines for receipt of copy in the Placement Service office are January 15, March 15, May 15, July 15, and September 15.

The following notices are abstracted by the Placement Service between September 15, 1981 and January 15, 1982. They are supplementary to the ASCB Annual Bulletin and will appear only once, unless otherwise instructed. For information about Placement Service listings, contact Ms. Marlene Johnson, Box 3011, Duke Medical Center, Durham, NC 27710 (telephone 919, 684-5458).

POSITIONS DESIRED

(5123) 4/3/54; Ph.D. expected 1982 (biochemistry) Colorado State Univ. with Dr. James R. Bamburg. Interests: Protein biochemistry, cell biology: protein purification and characterization, enzyme assay development, protein modification, radiochemistry, spectroscopy, cell and tissue culture, cell synchronization, light and electron microscopy. Recombinant DNA, membrane biochemistry, hormones, monoclonal antibodies, plant biochemistry. Taught: Graduate tissue culture laboratory, undergraduate biochemistry laboratory sections. Available 2/82. Salary $15,000. Contact: Craig S. Heacock, Biochemistry Department, Colorado State University, Fort Collins, Colorado 80523.

POSITIONS AVAILABLE

(4726) Postdoctoral Fellowship. Applicants with strong background in cell or developmental biology to perform research on the regulation of proliferation and differentiation of hematopoietic stem cells in vitro. Requires MD or Ph.D., U.S. citizen or permanent resident. Salary $15-$16,000 Available: Send CV, bibliography and names of 3 referees to Dr. Fritz Sieber, The Johns Hopkins University School of Medicine, 924 Traylor Research Building, 720 Rutland Avenue, Baltimore, MD 21205. Call (301) 955-3222.

CONTENTS

VOLUME 92 NUMBER 1 JANUARY 1982

Review

1 **D. D. Sabatini, G. Kreibich, T. Morimoto, and M. Adesnik.** Mechanisms for the incorporation of proteins in membranes and organelles

Regular Articles

23 **E. C. Beyer, and S. H. Barondes.** Quantitation of two endogenous lactose-inhibitable lectins in embryonic and adult chicken tissues

28 **E. C. Beyer, and S. H. Barondes.** Secretion of endogenous lectin by chicken intestinal goblet cells

34 **S. H. Zigmond, S. J. Sullivan, and D. A. Lauffenburger.** Kinetic analysis of chemotactic peptide receptor modulation

44 **K. A. Fisher.** Spectroscopic assays for measuring quantities of erythrocyte membrane "halves"

53 **E. L. Hertzberg, D. J. Anderson, M. Friedlander, and N. B. Gilula.** Comparative analysis of the major polypeptides from liver gap junctions and lens fiber junctions

60 **F. J. Barrantes.** Oligomeric forms of the membrane-bound acetylcholine receptor disclosed upon extraction of the M_r 43,000 nonreceptor peptide

69 **I. Yahara, F. Harada, S. Sekita, K. Yoshihira, and S. Natori.** Correlation between effects of 24 different cytochalasins on cellular structures and cellular events and those on actin in vitro

79 **M. Schliwa.** Action of cytochalasin D on cytoskeletal networks

92 **D. Louvard, H. Reggio, and G. Warren.** Antibodies to the Golgi complex and the rough endoplasmic reticulum

108 **J. J.-C. Lin, and S. A. Queally.** A monoclonal antibody that recognizes Golgi-associated protein of cultured fibroblast cells

113 **T. M. Roberts, and S. Ward.** Membrane flow during nematode spermiogenesis

121 **G. A. Nelson, T. M. Roberts, and S. Ward.** *Caenorhabditis elegans* spermatozoan locomotion: amoeboid movement with almost no actin

132 **T. M. Roberts, and S. Ward.** Centripetal flow of pseudopodial surface components could propel the amoeboid movement of *Caenorhabditis elegans* spermatozoa

139 **J. J. M. Bergeron, R. A. Rachubinski, R. A. Sikstrom, B. I. Posner, and J. Paiement.** Galactose transfer to endogenous acceptors within Golgi fractions from rat liver

147 **J. Paiement, R. Rachubinski, N. M. K. Ng Ying Kin, R. Sikstrom, and J. J. M. Bergeron.** Membrane fusion and glycosylation in the rat hepatic Golgi apparatus

155 **J. A. Weatherbee, P. Sherline, R. N. Mascardo, J. G. Izant, R. B. Luftig, and R. R. Weihing.** Microtubule-associated proteins of HeLa cells: heat-stability of the 200,000 mol wt HeLa MAPs and detection of the presence of MAP-2 in HeLa cell extracts and cycled microtubules

164 **P. Rubenstein, T. Ruppert, and A. Sandra.** Selective isoactin release from cultured embryonic skeletal muscle cells

170 **M. R. Kuchka, and J. W. Jarvik.** Analysis of flagellar size control using a mutant of *Chlamydomonas reinhardtii* with a variable number of flagella

176 **J. Hatzfeld, R. Miskin, and E. Reich.** Acetylcholine receptor: effects of proteolysis on receptor metabolism

183 **D. M. Larson, and J. D. Sheridan.** Intercellular junctions and transfer of small molecules in primary vascular endothelial cultures

192 **J. R. Morris, and R. J. Lasek.** Stable polymers of the axonal cytoskeleton: the axoplasmic ghost

199 **B. Burnside, B. Smith, M. Nagata, and K. Porrello.** Reactivation of contraction in detergent-lysed teleost retinal cones

207 **D. W. Tank, E.-S. Wu, and W. W. Webb.** Enhanced molecular diffusibility in muscle membrane blebs: release of lateral constraints

213 **D. Bok, J. Dockstader, and J. Horwitz.** Immunocytochemical localization of the lens main intrinsic polypeptide (MIP26) in communicating junctions

Rapid Communications

221 **P. Meda, E. Kohen, C. Kohen, A. Rabinovitch, and L. Orci.** Direct communication of homologous and heterologous endocrine islet cells in culture

227 **J. D. Malone, S. L. Teitelbaum, G. L. Griffin, R. M. Senior, and A. J. Kahn.** Recruitment of osteoclast precursors by purified bone matrix constituents

231 **J. Prives, A. B. Fulton, S. Penman, M. P. Daniels, and C. N. Christian.** Interaction of the cytoskeletal framework with acetylcholine receptor on the surface of embryonic muscle cells in culture

237 **R. M. Hays, J. Bourguet, B. H. Satir, N. Franki, and J. Rapoport.** Retention of antidiuretic hormone-induced particle aggregates by luminal membranes separated from toad bladder epithelial cells

VOLUME 92 NUMBER 2 FEBRUARY 1982

Regular Articles

249 **A. R. Poole, I. Pidoux, and L. Rosenberg.** Role of proteoglycans in endochondral ossification: immunofluorescent localization of link protein and proteoglycan monomer in bovine fetal epiphyseal growth plate

261 **J. C. Gingrich, L. K. Blaha, and A. N. Glazer.** Rod substructure in cyanobacterial phycobilisomes: analysis of *Synechocystis* 6701 mutants in low in phycoerythrin

269 **A. H. Bunt and J. C. Saari.** Fucosylated protein of retinal cone photoreceptor outer segments: morphologic and biochemical analyses

277 **J. Finne, M. M. Burger, and J.-P. Prieels.** Enzymatic basis for a lectin-resistant phenotype: increase in a fucosyltransferase in mouse melanoma cells

283 **F. D. Howard, H. R. Petty, and H. M. McConnell.** Identification of phagocytosis-associated surface proteins of macrophages by two-dimensional gel electrophoresis

289 **S. Gunther, R. W. Alexander, W. J. Atkinson, and M. A. Gimbrone, Jr.** Functional angiotensin II receptors in cultured vascular smooth muscle cells

299 **B. L. Granger, E. A. Repasky, and E. Lazarides.** Synemin and vimentin are components of intermediate filaments in avian erythrocytes

313 **R. M. Leven and V. T. Nachmias.** Cultured megakaryocytes: changes in the cytoskeleton after ADP-induced spreading

324 **M. Taniguchi and H. Ishikawa.** *In situ* reconstitution of myosin filaments within the myosin-extracted myofibril in cultured skeletal muscle cells

333 **P. A. St. John, S. C. Froehner, D. A. Goodenough, and J. B. Cohen.** Nicotinic postsynaptic membranes from *Torpedo*: sidedness, permeability to macromolecules, and topography of major polypeptides

343 **A. Martinez-Hernandez, S. Gay, and E. J. Miller.** Ultrastructural localization of type V collagen in rat kidney

350 **R. Munson, Jr., K. L. Caldwell, and L. Glaser.** Multiple controls for the synthesis of muscle-specific proteins in BC_3H1 cells

357 **A. Oohira, T. N. Wight, J. McPherson, and P. Bornstein.** Biochemical and ultrastructural studies of proteoheparan sulfates synthesized by PYS-2, a basement membrane-producing cell line

368 **H. Plattner, C. Westphal, and R. Tiggemann.** Cytoskeleton–secretory vesicle interactions during the docking of secretory vesicles at the cell membrane in *Paramecium tetraurelia* cells

378 **U. W. Goodenough, P. A. Detmers, and C. Hwang.** Activation for cell fusion in *Chlamydomonas*: analysis of wild-type gametes and nonfusing mutants

387 **K. A. Holbrook, B. A. Dale, and K. S. Brown.** Abnormal epidermal keratinization in the repeated epilation mutant mouse

398 **I. I. Singer.** Association of fibronectin and vinculin with focal contacts and stress fibers in stationary hamster fibroblasts

409 **A. O. Jorgensen, A. C. Y. Shen, D. H. MacLennan, and K. T. Tokuyasu.** Ultrastructural localization of the Ca^{2+} + Mg^{2+}–dependent ATPase of sarcoplasmic reticulum in rat skeletal muscle by immunoferritin labeling of ultrathin frozen sections

417 **C. Tietze, P. Schlesinger, and P. Stahl.** Mannose-specific endocytosis receptor of alveolar macrophages: demonstration of two functionally distinct intracellular pools of receptor and their roles in receptor recycling

425 **A. E. Boyd III, W. E. Bolton, and B. R. Brinkley.** Microtubules and beta cell function: effect of colchicine on microtubules and insulin secretion in vitro by mouse beta cells

435 **R. B. Vallee.** A Taxol-dependent procedure for the isolation of microtubules and microtubule-associated proteins

443 **R. W. Kensler and R. J. C. Levine.** An electron microscopic and optical diffraction analysis of the structure of *Limulus* telson muscle thick filaments

452 **J. E. Aubin, J. N. M. Heersche, M. J. Merrilees, and J. Sodek.** Isolation of bone cell clones with differences in growth, hormone responses, and extracellular matrix production

462 **E. Schwartz, R. S. Bienkowski, B. Coltoff-Schiller, S. Goldfischer, and O. O. Blumenfeld.** Changes in the components of extracellular matrix and in growth properties of cultured aortic smooth muscle cells upon ascorbate feeding

471 **G. F. Gauthier, S. Lowey, P. A. Benfield, and A. W. Hobbs.** Distribution and properties of myosin isozymes in developing avian and mammalian skeletal muscle fibers

485 **J. A. McDonald, D. G. Kelley, and T. J. Broekelmann.** Role of fibronectin in collagen deposition: Fab' to the gelatin-binding domain of fibronectin inhibits both fibronectin and collagen organization in fibroblast extracellular matrix

493 **L. Rifas, J. Uitto, V. A. Memoli, K. E. Kuettner, R. W. Henry, and W. A. Peck.** Selective emergence of differentiated chondrocytes during serum-free culture of cells derived from fetal rat calvaria

505 **A. Vandewalle, B. Köpfer-Hobelsberger, and H.-G. Heidrich.** Cortical cell populations from rabbit kidney isolated by free-flow electrophoresis: characterization by measurement of hormone-sensitive adenylate cyclase

514 **R. Sealock.** Cytoplasmic surface structure in postsynaptic membranes from electric tissue visualized by tannic acid-mediated-negative contrasting

523 **P. A. Steck, J. Blenis, P. G. Voss, and J. L. Wang.** Growth control in cultured 3T3 fibroblasts. II. Molecular properties of a fraction enriched in growth inhibitory activity

531 **R. E. Kellems, M. E. Harper, and L. M. Smith.** Amplified dihydrofolate reductase genes are located in chromosome regions containing DNA that replicates during the first half of S-phase

540 **C. G. Jensen.** Dynamics of spindle microtubule organization: kinetochore fiber microtubules of plant endosperm

559 **N. Haga, M. Forte, Y. Saimi, and C. Kung.** Microinjection of cytoplasm as a test of complementation in *Paramecium*

565 **R. G. Painter and M. Ginsberg.** Concanavalin A induces interactions between surface glycoproteins and the platelet cytoskeleton

Rapid Communications

575 **B. S. Eckert, R. A. Daley, and L. M. Parysek.** Assembly of keratin onto PtK_1 cytoskeletons: evidence for an intermediate filament organizing center

579 **D. I. Meyer, D. Louvard, and B. Dobberstein.** Characterization of molecules involved in protein translocation using a specific antibody

584 **H. Seppä, G. Grontendorst, S. Seppä, E. Schiffmann, and G. R. Martin.** Platelet-derived growth factor is chemotactic for fibroblasts

589 **R. Bernhardt and A. Matus.** Initial phase of dendrite growth: evidence for the involvement of high molecular weight microtubule-associated proteins (HMWP) before the appearance of tubulin

VOLUME 92 NUMBER 3 MARCH 1982

Regular Articles

597 **D. Gal, E. R. Simpson, J. C. Porter, and J. M. Snyder.** Defective internalization of low-density lipoprotein in epidermoid cervical cancer cells

604 **E. L. Bearer and D. S. Friend.** Modifications of anionic-lipid domains preceding membrane fusion in guinea pig sperm

616 **L. A. Jaffe, M. Gould-Somero, and L. Z. Holland.** Studies of the mechanism of the electrical polyspermy block using voltage clamp during cross-species fertilization

622 **E. W. Stommel, R. E. Stephens, H. R. Masure, and J. F. Head.** Specific localization of scallop gill epithelial calmodulin in cilia

629 **D. J. Scharff, A. M. Delegeane, and A. S. Lee.** Characterization of a cell cycle mutant derived from hamster fibroblasts: reversion analysis

634 **P. L. Zeitlin and A. L. Hubbard.** Cell surface distribution and intracellular fate of asialoglycoproteins: a morphological and biochemical study of isolated rat hepatocytes and monolayer cultures

648 **P. T. Matsudaira and D. R. Burgess.** Partial reconstruction of the microvillus core bundle: characterization of villin as a Ca^{++}-dependent, actin bundling/depolymerizing protein

657 **P. T. Matsudaira and D. R. Burgess.** Organization of the cross-filaments in intestinal microvilli

665 **E. B. Lane.** Monoclonal antibodies provide specific intramolecular markers for the study of epithelial tonofilament organization

674 **P. A. Fisher, M. Berrios, and G. Blobel.** Isolation and characterization of a proteinaceous subnuclear fraction composed of nuclear matrix, peripheral lamina, and nuclear pore complexes from embryos of *Drosophila melanogaster*

687 **Y. Yarden, A. B. Schreiber, and J. Schlessinger.** A nonmitogenic analogue of epidermal growth factors induces early responses mediated by epidermal growth factor

694 **S. M. Schuetze and D. A. Goodenough.** Dye transfer between cells of the embryonic chick lens becomes less sensitive to CO_2 treatment with development

706 **K. Ogawa, S. Negishi, and M. Obika.** Immunological dissimilarity in protein component (dynein 1) between outer and inner arms within sea urchin sperm axonemes

714 **Y. Lange, R. A. Hadesman, and T. L. Steck.** Role of the reticulum in the stability and shape of the isolated human erythrocyte membrane

722 **C. J. Brokaw, D. J. L. Luck, and B. Huang.** Analysis of the movement of *Chlamydomonas* flagella: the function of the radial spoke system is revealed by comparison of wild-type and mutant flagella

733 **S. M. Penningroth, A. Cheung, K. Olehnik, and R. Koslosky.** Mechanochemical coupling in the relaxation of rigor-wave sea urchin sperm flagella

742 **M. Schindler and J. P. Rosenbusch.** Chemical modification of matrix porin from *Escherichia coli*: probing the pore topology of a transmembrane protein

747 **W. S. Haston, J. M. Shields, and P. C. Wilkinson.** Lymphocyte locomotion and attachment on two-dimensional surfaces and in three-dimensional matrices

753 **M. Mishkind, N. V. Raikhel, B. A. Palevitz, and K. Keegstra.** Immunocytochemical localization of wheat germ agglutinin in wheat

765 **M. E. Stearns.** High voltage electron microscopy studies of axoplasmic transport in neurons: a possible regulatory role for divalent cations

777 **K. Ishiguro, H. Murofushi, and H. Sakai.** Evidence that cAMP-dependent protein kinase and a protein factor are involved in reactivation of Triton X-100 models of sea urchin and starfish spermatozoa

783 **M.-C. Yao.** Elimination of specific DNA sequences from the somatic nucleus of the ciliate *Tetrahymena*

790 **M. Nagy, J. Laporte, B. Penverne, and G. Hervé.** Nuclear localization of aspartate transcarbamoylase in *Saccharomyces cerevisiae*

795 **J. Breckler and E. Lazarides.** Isolation of a new high molecular weight protein associated with desmin and vimentin filaments from avian embryonic skeletal muscle

807 **R. P. Futrelle, J. Traut, and W. G. McKee.** Cell behavior in *Dictyostelium discoideum*: preaggregation response to localized cyclic AMP pulses

822 **K. E. Howell and G. E. Palade.** Hepatic Golgi fractions resolved into membrane and content subfractions

833 **K. E. Howell and G. E. Palade.** Heterogeneity of lipoprotein particles in hepatic Golgi fractions

846 **E. M. Merisko, M. G. Farquhar, and G. E. Palade.** Coated vesicle isolation by immunoadsorption on *Staphylococcus aureus* cells

Rapid Communications

859 **D. K. Wilcox, R. P. Kitson, and C. C. Widnell.** Inhibition of pinocytosis in rat embryo fibroblasts treated with monensin

865 **H. J. Geuze, J. W. Slot, G. J. A. M. Strous, H. F. Lodish, and A. L. Schwartz.** Immunocytochemical localization of the receptor for asialoglycoprotein in rat liver cells

871 **W. C. Earnshaw, O. P. Rekvig, and K. Hannestad.** Histones synthesized for use in early development of *Xenopus laevis* are stored as a complex with antigenic properties similar to those of the octamer core of nucleosomes

877 **B. D. Trapp and R. H. Quarles.** Presence of the myelin-associated glycoprotein correlates with alterations in the periodicity of peripheral myelin

883 Correction

INFORMATION FOR SUBSCRIBERS

SUBSCRIPTIONS—The basic subscription price per year (four volumes, three issues each) for institutions and individuals is $200. Students are eligible for the reduced rate of $100. Members of The American Society for Cell Biology may obtain the Journal for $90 through the Society (addressed to Dr. Robert L. Trelstad, Secretary, The American Society for Cell Biology, 9650 Rockville Pike, Bethesda, MD 20814). (Please add $30 for airmail surcharge to all European subscriptions.) Single copies are sold at $16.75. Subscriptions, payable in advance, start with the first issue of the calendar year.

Payments and *inquiries* about membership in the American Society for Cell Biology should be addressed to Dr. Robert L. Trelstad, Secretary, The American Society for Cell Biology, 9650 Rockville Pike, Bethesda, MD 20814.

All other inquiries about subscriptions and back issues should be addressed to the Order Service of The Rockefeller University Press, 1230 York Avenue, New York 10021.

Remittances should be made by check or money order payable to The Rockefeller University Press and addressed to Post Office Box 5108, Church Street Station, New York 10249. All checks *must* be drawn on U. S. banks.

Claims for nonreceipt of issues will be honored when received within 3 months of mailing for U. S. A. subscribers, 6 months for foreign subscribers.

MICROFORM—Subscriptions and back copies from Vol. 1 on, are available in microfiche and microfilm through University Microfilms, 300 North Zeeb Road, Ann Arbor, MI 48106.

790 **M. Nagy, J. Laporte, B. Penverne, and G. Hervé.** Nuclear localization of aspartate transcarbamoylase in *Saccharomyces cerevisiae*

795 **J. Breckler and E. Lazarides.** Isolation of a new high molecular weight protein associated with desmin and vimentin filaments from avian embryonic skeletal muscle

807 **R. P. Futrelle, J. Traut, and W. G. McKee.** Cell behavior in *Dictyostelium discoideum*: preaggregation response to localized cyclic AMP pulses

822 **K. E. Howell and G. E. Palade.** Hepatic Golgi fractions resolved into membrane and content subfractions

833 **K. E. Howell and G. E. Palade.** Heterogeneity of lipoprotein particles in hepatic Golgi fractions

846 **E. M. Merisko, M. G. Farquhar, and G. E. Palade.** Coated vesicle isolation by immunoadsorption on *Staphylococcus aureus* cells
